Dimensions (unit in mm):
Ø115mm x 91mm

MR652 HD 30M-Range IR Fixed Dome IP Camera in the L series features 1080p resolution at 30 frames per second, built-in Sense up+ technology to deliver stunning video in low-light conditions. Utilizing IP66, HDR, AGC control, and 3D Noise Reduction, the combination successfully delivers the ultimate low-light image with infrared. The support of PoE, privacy mask, and white balance, as well as the minimum illumination of 0.15 Lux at F2.0 will satisfy multiple applications.

Product Features

Back Light Compensation

Back Light Compensation (BLC) adjusts the exposure of the entire image to properly expose the subject of interest. Whether the subject is moving toward left, right, up, down, or any direction on the screen, BLC will provide the perfect exposure for the subject in front of a strong back light.

Sense Up+

Sense up+ is able to deliver outstanding video outputs in poor light conditions without experiencing motion blur. With this technology, you can see video more clearly during nighttime when sufficient lighting is lacking.

Video Security App

LILINViewer is available for both Android and iOS devices. This application provides security alarm push notification, real-time live viewing, and remote video playback.
Day and Night Operations via Removal of the IR-cut filter

MR652 is equipped with a mechanical IR cut filter to increase IR sensitivity and improve nighttime images. The adjustable filter allows day and night operations even in the low lux conditions, and can provide outstanding vision.

Built-in IR Illumination

The camera includes infrared (IR) LEDs for IR illumination to provide night vision up to 30 meters.

Motion Detection

If properly set up, any motion in front of the camera will be detected and saved as an event. Motion in the selected area will provoke an alert.

ONVIF-compliant

Open Network Video Interface Forum (ONVIF) is a standard for physical IP based security products. MR652 camera is ONVIF Profile S conformant

Wind and Rain Standards

Meet international IP66 standards for dust and moisture resistant. In installations in environments, all cameras are subject to wind and rain

Privacy Masking

Privacy Masking can protect personal privacy by concealing specific areas in the camera's field of view. Doorways and house windows for example are not subject to surveillance.
