5. Do not install the equipment near any flammable gas. Violation may cause fire or injury.
6. Avoid running video and signal cables through or passing interference sources such as electromagnetic wave, broadcast station, power generator, elevator motor, or high voltage are, etc. Interference may cause the equipment not to function properly.
7. Make sure the power cable is properly connected. Loosened power cables may cause serious short circuit or fire.
8. Make sure all cables are properly connected. Do not place any object on the cables. Replace the cable if damaged. Violation may cause short circuit, fire, and injury.
9. Make sure all wires and cables are properly grounded to avoid damage caused by lightning.
10. Do not put any foreign objects inside the equipment and do not spray any liquid on the equipment to avoid short circuit and subsequent damage.
11. Do not touch power connection with wet hands to avoid short circuit or electric shock.
12. Do not apply external force on the equipment. Violation may cause damage.
13. Do not expose the equipment directly to sunlight. Violation may cause color fading or damage.
14. Do not install the equipment in high or low temperature environment to avoid damage. The operating temperature is between  $-40^{\circ}\text{C}$  -  $+50^{\circ}\text{C}$ .
15. The Fast Dome consists of highly sensitive electronic parts inside. Do not try to repair the equipment. Only a qualified technician may disassemble and repair the equipment. Shut off the power before disassembling the equipment and do not power it on unless the casing is completely closed.
16. Turn off the power immediately and contact the technician when the following occurs:
  - A. Damage on power cable or plug.
  - B. Water leak into the equipment.
  - C. Fast Dome does not function normally.

## Introduction

LILIN PSR5024EX20 / PSR5024EX30 is a day&night 2M resolution color high speed dome camera, which supports HD/Full HD resolution and digital signal processing (DSP) technology. The camera features 20/30X optical lens, digital zoom, auto focus/iris control, IR cut, auto gain control, wide dynamic range (WDR), back-light compensation, digital noise reduction, and electronic stabilization.

PSR5024EX20/30 is only 198mm in diameter. Within the adjustable range, this camera can either move smoothly or in high speed. The camera's moving speed ranges from  $0.1^{\circ}/s$  to  $300^{\circ}/s$ . The continuous 360 pan capability is free from the restriction of direction. Every PSR5024 camera supports 256 preset positions, which can be automatically monitored if set to the auto-scan mode.

PSR5024EX20/30 supports 4 sets of alarm-input. In a matter of seconds, your dome camera can be targeted to any preset position. The alarm inputs correspond to the preset positions for even more secure perimeter monitoring.

The new PSR5024EX20/30 camera has a compact and streamlined design. With the comprehensive functions that deliver maximum ease of use, the PSR5024 series is your ideal surveillance camera.

The cutting-edge H.264 AVC encoding technology delivers better compression rate and superior video quality at 56 Kbps to 3 Mbps bit rate. The dual streaming design supports both MJPEG and H.264 AVC formats to allow video streaming at low bandwidth (Internet) and high bandwidth (LAN) for quality optimization.

# Installation

## Structural Diagram

**Step 1 Remove the bracket from the base**

Loosen the four bolts from the base (FIG.1) and push the hinge upwards to separate it from the base (FIG.2).

**Step 2 Secure the bracket base to the wall**

Attach the installation sticker to the wall and drill four holes according to the instructions (FIG.3). Tighten four bolts to secure the base to the wall (FIG.4). To use the central hole on the base, first hammer the lid off (FIG.5).

Note The bolts are not included in the package.

**Step 3 Attach the quick release adaptor to the bracket**

First remove the quick release adaptor from the camera body. Align the adaptor with the bracket before tightening the bracket bolts (FIG.6 & FIG.7). Then slide the adaptor and bracket together down the hinge to connect to the base (FIG.8). Note: The three bolts on the adaptor must be loosened first to remove the adaptor.

**Step 4 Slip the control wires through the bracket**

Properly secure the safety strap to the bracket, and slip the safety strap, RJ-45 cable, and AC24V power connector through the bracket (FIG.9 & FIG.10). Secure the bracket to the base (FIG.11)

Note: The AC24V power connector is not needed to be connected when a PoE device is used.
